

5.1 Introduction to the Australian Medical Technology Industry

5.1 Introduction to the Australian Medical Technology Industry module forms part of the **5.0 Workforce Development course** and is designed to orientate new staff to the industry.

The Medical Technology Industry

The Australian medical technology industry includes Australian and overseas companies manufacturing and supplying medical devices, in vitro diagnostics and medical imaging equipment. The medical technology industry makes a highly significant contribution to the quality of health care in Australia.

What is the Workforce Development course?

Workforce development is seen as critical to enable employees to meet the constant challenges of the medical technology industry and to address the strategic goals of the company. A number of modules are available as part of a Workforce Development course to address this learning need.

The *Workforce Development* course consists of a series of modules. Modules 5.1, 5.2, 5.10 and 5.11 are delivered as self-paced online training. Modules 5.3 to 5.9 are online webinars offered through the *Orientation to Leadership and Management E-Learning Series*. Module 5.2 is the recommended pre-requisite training for the e-learning series. Modules 5.12-5.16 are delivered as online webinars. Module 5.17 is delivered face-to-face.
